

Laucala lies in the magical cosmos of the Fijian Pacific archipelago. One's imagination of the South Pacific, luscious sugar-like serene beaches, turquoise water, waves crashing, lush tropical vegetation, spectacular cliff top views, rich green mountains, scenic panoramas, swaying palm trees, and continually smiling people – all this awaits you at Laucala. Some people would describe it as paradise.

Laucala is a little different from what one might expect of a resort. Their integral philosophy encompasses the whole island, growing own livestock and vegetables, hand-crafting all their own guest products using the island's natural resources.

With your privacy in mind, our spacious residences can accommodate between two to six guests in 1 to 3 bedrooms. All 25 bureas (the Fijian name for house) are individually made out of Fijian materials combined with exclusively designed interiors. Features include extensive outdoor living areas, private pool, dinner pavilion, sun deck, day bed, lounge area, indoors and outdoors stone tubs as well as outdoor showers. The locations are set up in natural surroundings with private stretches of beach or unique panoramic views over the indigo bay. Each residence is individually named after certain characteristics of its setting, like Plateau or Peninsula Residence. At night the garden and residences will be illuminated by Tiki torches.
